

# SRIVATSAVA PUSARLA

Senior Product Manager — Applied AI for Regulated FinTech, Credit & Compliance

srivatp1@umbc.edu • (443) 868-4756 • Irving, TX

## SUMMARY

Senior Product Manager with 8+ years across applied AI and FinTech. Shipped credit and BNPL products in 8 markets driving ~\$25B TPV at PayPal and owned the asset-externalization platform that enabled ~\$60B in asset sales. Built Claude-powered RAG systems with eval harnesses, deterministic compliance checks, and HITL legal review for regulated product launches. Strongest where trust, latency, cost, and quality tradeoffs decide outcomes.

## EXPERIENCE

### Senior Product Manager

Jun 2022 – Present

PayPal Inc. — BNPL & Credit, Asset Externalization, Repayments, Acquisitions

~25 engineers, 2 teams

- **Built Claude-powered regulatory content platform** (RAG + eval harness + deterministic compliance checks + HITL legal review); **shipped prototype in 1 week**, authored PRD and model-selection criteria; engineering build **targeting 80% reduction in legal-review turnaround** to unblock a 16-week per-market credit-launch bottleneck.
- **Shipped Claude-powered Slack support agent** (RAG over GitHub, Confluence, and prior Slack threads, triggered by emoji reaction); **doubled on-call throughput (4–6 → 8–10 issues/day)** and reclaimed engineers' roadmap capacity previously lost to triage.
- **Owned roadmap for asset-externalization platform**, enabling **~\$60B in BNPL and revolving-credit asset sales** across the US and Europe over 3 years; defined investor data contracts, API requirements, and multi-investor workflows across 3 external funds.
- **Launched Pay Later 2 GO** (US, DE, IT) and **BNPL Pay Monthly** (FR, IT, ES, AT, AU) after customer-data analysis identified underserved borrower cohorts; **contributed to ~\$25B TPV and ~20% customer-base growth**.
- **Redesigned investor onboarding** for asset sales, **compressing onboarding from ~6 months to 2–3 months** and accelerating securitization readiness for new funding partners.

### Product Manager I

Oct 2021 – Mar 2022

Sezzle Inc.

- Led customer research and API integration for third-party lender connectivity; shipped first integration MVP and **cut high-frequency UX defects**, improving partner-flow reliability.

### Business Analyst

Apr 2021 – Oct 2021

NewDay USA

- Translated SLT and business requirements into product specs for offshore engineering, supporting on-time launch of a new internal product.

### Portfolio Content Developer Co-Op

Jan 2021 – Apr 2021

Nokia R&D

- Owned vision, PRD, and launch strategy for a computer-vision asset-localization product; replaced sensor-based detection to **cut sensor cost 52% and infrastructure cost 37%** versus the incumbent approach.

### Systems Engineer

Dec 2016 – Sep 2019

Tata Consultancy Services

- Acted as product analyst on an internal TCS launch with **zero rollbacks**; built RESTful APIs validating migration of **80M insurance policies**, saving **\$20K/year**.

## SELECTED AI PROJECTS

- **Options-Flow Intelligence Agent** — Built a Python, Playwright, and Claude API agent that converts unstructured market-flow data into ranked daily Discord alerts; designed signal-ranking logic, alert UX, and reliability checks for repeatable trader workflows.
- **Scam & Fraud Detection Classifier** (*in progress*) — AI scam-risk classifier that scores inbound SMS, email, and URLs using sender reputation, language patterns, link structure, and intent signals; designed consumer-facing risk bands to make phishing detection understandable for non-technical users.

## SKILLS

**AI / ML:** LLM applications (Claude, GPT, Gemini), RAG & hybrid retrieval, prompt engineering, eval design (LLM-as-judge, deterministic checks, HITL), model selection, AI guardrails, latency & cost tradeoffs, computer vision

**Product:** Strategy, roadmaping, discovery, A/B testing, GTM, KPIs & OKRs, platform & API requirements, Agile / SDLC, stakeholder management

**Data & Tools:** SQL, Snowflake, Python, Tableau, Power BI, Figma, Jira, Confluence, Git, Postman

## EDUCATION

**M.S., Information Systems** — University of Maryland, Baltimore County | GPA: 3.81 / 4.00

**Aug 2019 – May 2021**
